Full Stack Developer | .NET Core | Angular |
Azure | Microservices

PROFILE SUMMARY

Full Stack Developer with **4 years of experience** in building enterprise-grade web applications using **.NET Core, Angular, and Azure**. Experienced in developing **RESTful APIs**, implementing **microservices**, and modernizing legacy applications. Skilled in **React, SQL Server, Azure DevOps**, and **CI/CD automation**. Strong understanding of **SOLID principles, Clean Architecture**, and **Agile methodologies**, with experience in application enhancements, production issue resolution, and client collaboration.

EXPERIENCE

IBM

Sept 2025 — Present

Application Developer (Full Stack .NET Developer)

Infopark, Kochi

- Worked across multiple enterprise projects involving **.NET applications** built using **Repository Pattern**-based architecture, with **React** for frontend development.
- Contributed to **bug fixing, debugging, and application enhancements** to improve application functionality, stability, and maintainability.
- Worked with **Microsoft SQL Server** and **Azure SQL Database** for database-related development, query analysis, and troubleshooting.
- Monitored **Azure Data Factory (ADF)** pipelines and supported issue investigation and resolution.
- Worked with **Azure DevOps CI/CD pipelines** to automate application deployments, streamline release workflows, and minimize manual intervention.
- Used **ServiceNow, Azure DevOps, and Jira** for **ticket management, issue tracking, and work item tracking** in an Agile environment.
- Performed **REST API testing and validation** using **Insomnia** to support debugging and issue resolution.
- Participated in **direct client interactions** to clarify requirements, discuss technical issues, and support project delivery.
- Prepared and delivered **application-specific client presentations** and obtained **Olympic certification** as required for project activities.
- Leveraged **Claude** as an AI-assisted development tool to support development and problem-solving activities.

Guidehouse India Private Limited

Aug 2022 — Sept 2025

Software Engineer (Full Stack .NET Developer)

Technopark, Thiruvananthapuram

- Modernized application modules using **.NET Core, Angular, and Blazor**, improving performance and user experience.
- Migrated over **20 stored procedures** to **LINQ-based queries**, improving maintainability and achieving a **15% performance gain**.
- Worked extensively on a legacy revenue management system using **ASP.NET Web Forms, ASP.NET MVC**, and complex **SQL stored procedures**, supporting issue resolution and critical enhancements.
- Built scalable **microservices** with **Azure Functions** and **Azure Service Bus**, and developed secure **RESTful APIs** following **SOLID principles** and **Clean Architecture**.
- Implemented **JWT-based authentication** to enforce secure, role-based access across distributed systems.
- Resolved high-priority production issues across legacy and modern applications through debugging and **root cause analysis**.
- Authored technical documentation, delivered **knowledge transfer (KT) sessions**, and mentored junior developers on full-stack development practices.
- Received the **Best Performer Award (Mar 2024)** and was a finalist in the **Guidehouse Hackathon 2023**.

TECHNICAL SKILLS

- **Languages:** C#, Python, JavaScript, TypeScript, SQL
- **Frontend:** Angular, React, Blazor, HTML5, CSS, Bootstrap, Tailwind CSS, jQuery
- **Backend:** .NET Core, ASP.NET MVC, ASP.NET Web Forms, Entity Framework Core, LINQ
- **Databases:** Microsoft SQL Server, Azure SQL Database
- **Cloud:** Microsoft Azure, Azure Data Factory (ADF), Azure Functions, Azure Service Bus, Azure App Configuration
- **DevOps & CI/CD:** Azure DevOps Pipelines, CI/CD, Automated Deployment, Git, GitHub, GitHub Actions
- **Ticketing & Project Management:** ServiceNow, Azure DevOps, Jira
- **API Testing Tools:** Insomnia, Postman, Swagger
- **Architecture & Design:** Repository Pattern, Clean Architecture, Microservices, Monolithic Architecture, SOLID Principles
- **Testing & Debugging:** xUnit, Unit Testing, Root Cause Analysis
- **AI Development Tools:** GitHub Copilot, Claude
- **Methodologies:** Agile, Scrum

EDUCATION

B.Tech (Computer Science and Engineering) - APJ Abdul Kalam Technological University, CGPA: 7.1(71%)

Aug 2018 — Jul 2022

Higher Secondary (Biology-Mathematics) - Kerala Board of Higher Secondary Education

Jun 2016 — May 2018

PROJECTS

- **SongBird – Lyric Video Creator** - [GitHub](#)
 - Developed a full-stack application using ASP.NET Core Web API, React, and SQL Server to create and manage lyric video projects.
 - Integrated FFmpeg to generate synchronized lyric videos from audio files, background images, and timestamped lyrics using LRC/SRT formats.
 - Implemented video project management, an SRT subtitle editor, and configurable fonts and visual effects.
 - Used Entity Framework Core for database operations and designed RESTful APIs.
- **Transportation Management App**(Guidehouse Internal Project) — Built a web-based application for managing employee transport schedules using **.NET Core**, **Angular**, and **SQL Server**, improving booking efficiency and allocation visibility.
- **Landslide Detection System** — Academic Research Developed a system to detect potential landslides using sensor data and early warning models. Published findings in **IJRASET** and **JETIR** journals.

CERTIFICATIONS

- **Microsoft Certified: Azure Fundamentals (AZ-900)** [🔗](#)
- **GitHub Copilot Certification (GH-300)** [🔗](#)
- **Olympe Certification** [🔗](#)

ACHIEVEMENTS

- **Best Performer (GEM) Award** [🔗](#) – Guidehouse, Mar 2024
- Finalist – **Guidehouse Hackathon 2023**
- Published research papers on landslide detection systems:
 - **IJRASET: Study on Landslide Detection Methods** [🔗](#)
 - **JETIR: Landslide Detection System for Reducing Casualties** [🔗](#)
